

The scatter plot displays the relationship between Weight (kg) and an unlabeled variable. The x-axis represents Weight (kg) from 0 to 160, and the y-axis represents an unlabeled variable from 0 to 10. Data points are colored by weight: yellow (low weight), green (medium weight), teal (higher weight), and purple (highest weight). The plot shows a general upward trend, with a dense cluster of points between 70 and 90 kg.
